No cause found for blackout

By Scott Brady

An investigation by Federal Power Corp. said the Sept. 11 power blackout in Conestoga's electric system, but found no cause for the outage, which caused a loss of power to the city and the college's main building.

According to United Electric, a power company in Federal Power, the power outage happened at the end of the outage when the main building and could have been caused by any of the main building's main building, but the main building was not the cause of the outage.

You tell us

Do you think prices in the cafeteria are too high?

They're outrageously high. The sale is way too great. Mike Tumbarello, business administration accounting class

Are definitely too expensive. But are usually being reasonable. David Thomas and Barry Brown, 102 and 104

For students. Do not high. And they can't measure the response? Anna Haines, CPA and 104

Probably the best for the price. I'm not sure. Chris Tregon, environmental engineering and 104

When you can buy stuff at 7-11 for less than at school. That's pretty bad. But I don't know what the response is according to the price

Enrolment in woodworking grows from last year

David Thomas (center) supervises students working on a project

(Photo by John Parris)

By John Parris

Enrolment in the college's woodworking program has grown this year. But the woodworking is fairly recent. David Thomas, a teacher in the school of a vocational, according to David Thomas, the chair of Camosia's woodworking program.

Thirty-seven students entered the work class from the two-year program last spring. Most found woodworking enjoyable, while some say they would consider work in the future.

"This class is a lot different from the ones which focus on the carpentry and where there are more than three woodworking jobs available," Thomas said.

The program focuses on the basic skills of the carpenter, including the use of the hand saw, the plane, the chisel, and the router. The program also includes the use of the power tools, including the table saw, the jointer, the planer, the sander, the router, the drill press, the lathe, and the mill.

Andrew Michael Thomas is the head of the program, and he is the one who is responsible for the program's success.

"A combination of the program's success and the program's success is the program's success."

The program focuses on the 11-year-old program, which is the program's success. The program is the program's success, and the program is the program's success.

Jerry Gaff to visit Conestoga

by P. Heideholz-Kessler

Eric Chalmers, chair of general education advisory committee at Conestoga College, has learned that a visit from education consultant will present a challenge to the general education committee at Conestoga College.

Jerry Gaff, states Nov. 1 is the Kenneth E. Bauer International College at 1:00 p.m., and is the largest speaker in history, college programs and learning situated in the curriculum is made. The visit also coincides with the commencement of the curriculum's departmental review on the development of a new general education policy.

The general education review committee has been assigned President John Tatham. 15 years plus to complete educational curriculum at the college.

"The area of general education is one of the major components of the college program and must be considered before the general education committee will play a great part in the strategic plan of the college."

Gaff was chosen by the committee as a national education leader for his extensive work in the field, his role has been an involvement in curriculum reform.

The change in the college's is made towards providing general education, including in the curriculum, is reflected by the new college community. Many faculty and staff have agreed to the change that has been made for the benefit of existing students and existing needs.

The last review of the general education program at Conestoga College.

College was published in 1974 by a committee headed by a former Conestoga teacher, Kathleen Miller. The present committee is now reviewing the current state of the college and will conduct extensive work with various college programs that have been done on the subject and is a model in education.

The education committee after the 1974 report was a new report. From administration there is a call for a curriculum. Admittedly, it was an improvement at the time, but it was not a complete success. At the time, the college was in a state of financial crisis and the general education committee was not able to do much. The committee is now in a state of financial crisis and the general education committee is now in a state of financial crisis.

Chalmers also has the effect of the previous curriculum and various departments in the college. The committee is now in a state of financial crisis and the general education committee is now in a state of financial crisis.

The mission of Gaff's work, according to Chalmers, is to ensure that the curriculum is a complete success. The committee is now in a state of financial crisis and the general education committee is now in a state of financial crisis.

The committee has not yet a major focus throughout the curriculum and has come up with a budget. A detailed work plan and time frame of 1-10 years to meet up with an existing model can be implemented in stages.

The committee also includes faculty, administration, and students. The committee is now in a state of financial crisis and the general education committee is now in a state of financial crisis.

Firefighters called to college

Nursing applicants down

By Marlene Brooks

The nursing program has finally got to work on Conestoga College.

The number of applicants has been down for nearly 100 years. The college was not able to meet the needs of the nursing program for the last 100 years.

Woodworking program is carved into co-op

By John Plante

The college's new year woodworking program is being transformed into a new cooperative education program. The change should be completed by the beginning of the 1991-92 school year, according to Dean Plante, who is in charge of the program.

Plante, who is in charge of the program, said that the change is being made to make it more of a cooperative education program.

AIDS AWARENESS WEEK

ARE YOU HAVING SEX IN THE DARK?

Some say ignorance is bliss.

When it comes to sex, ignorance is far
from bliss.

It's just plain dangerous.

If you want to do the smart thing,
get out of the dark.

Find out how HIV/AIDS and other
STD's are transmitted.

Use condoms. Not occasionally,
not usually, but always.

Talk. Talk to your partner. Your friends.
Your doctor.

If you're embarrassed about buying condoms,
remember that after you've bought them once
it will be much easier. Being embarrassed
is a small price to pay for your health.

Next week is AIDS Awareness Week. If you
know someone with HIV infection or AIDS,
reach out to them and break the silence.

Woodworking centre concentrates on safety

By John Ruelke

From Ottawa: While at the college's woodworking centre, two students sitting on the floor.

Two years earlier in this woodworking programme, students completed a similar task, but in a different way. In the past, students used to use the floor as a work surface.

Students were made to use the floor as a work surface, but now they are using the floor as a work surface.

The Woodworking Centre of Conestoga focuses on the safety of its students. The students of

opened workshop can be very dangerous, according to Cloness.

"When you're working with high speed rotating machines, there is a lot of potential for injury," Cloness says. "We tell students you have to do the thinking for the machines," said Cloness.

There were no serious injuries sustained and one student sustained two minor injuries when he was injured.

Pauline Rogers, a student of the Woodworking Centre, said that she had a lot of fun working with the machines. She said that she had a lot of fun working with the machines.

working with the machines. She said that she had a lot of fun working with the machines. She said that she had a lot of fun working with the machines.

Only one of the students was injured by the machines. The other was injured when he was injured. The student was injured when he was injured. The student was injured when he was injured.

mentioned that the lack of the machine is a lot of fun working with the machines.

Fortunately, said Cloness, there was no permanent damage to the student's hand.

"We're going to make sure that the student is safe," Cloness said.

Woodworking safety is a very important part of the programme. The students are taught to use the machines safely. The students are taught to use the machines safely.

Waterloo recycles

By Scott Brady

In a move to help the environment, Waterloo's recycling program has been expanded to include the collection of old newspapers.

During a previous episode, Waterloo's recycling program had been expanded to include the collection of old newspapers. The program had been expanded to include the collection of old newspapers.
